COMPANY INTRODUCTION

Over the last 20 years, our team has been working on designing, manufacturing and delivering construction nets, agricultural nets, fishing nets, and sports nets for almost every application.

As an ISO 9001 & CE certified manufacturer, we utilize premium PE materials and additives to ensure we only distribute the highest quality products.

Work with Naite to customize the most suitable nets for your project and enjoy friendly customer care.

SHADE NET

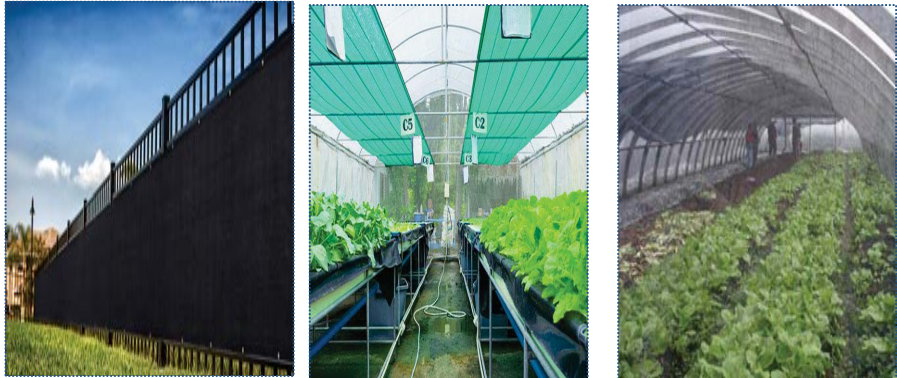

Material: High-density polyethylene (HDPE) and anti-UV additives Shading Effect: 15%, 35%, 40%, 50%, 75%, and 90%

Size: Width: 1-6m, length: 10-200m (common size: 2x50m, 4x50m)

Weight: 35-340g/m²(common weight: 90g/m², 180g/m²)

Color: White, black, red, blue, yellow, green etc, Warranty: 2-5 years

Accessories: Assistant rope and grommets for easy installation and extra durability.

Our shade nets and waterproof shade net feature custom mesh size and color combinations to provide different degrees of shading effect in summer and heat preservation & humidification effect in winter.

AGRICULTURAL NET

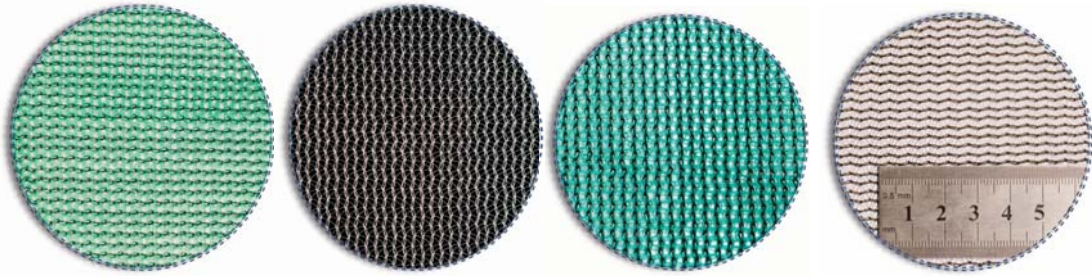

In the past 20 years, we have developed a broad range of agricultural net products for commercial agriculture and family farming, including shade nets, bird nets, hail nets, olive nets, and garden nets. Our agricultural nets can fulfill all the needs in shading, protection, harvesting, and vertical farming. Antibagging and anti-UV nets are ideal for large planting areas while allowing normal air and moisture circulation*

The agricultural net, as a barrier and convenient tool protects plants from strong sunshine and animals and benefits harvest.

SCAFFOLDING NET/DEBRIS NET

When conducting a construction project, it's necessary to enclose the worksite with nets all the time to protect workers and the public from the damage of falling debris and reduce project risks.

Besides construction safety nets, we also offer construction shade nets for shading the building, and windbreak nets for reducing dust and noise from the worksite.

Materials: High-density polyethylene (HDPE), flame retardants, antioxidant, and anti-UV additives

Shading Effect: 35%, 40%, 50%, 75%, and 90%

Wind Reducing: 35%-75%

Width: 1-8m

Length: 6-200m (common size: 1.8x6m, 2-4x50m)

Weight: 35-240g/m²

Color: Red, yellow, green, beige, white, grey, black, and white color

Warranty: 2-5 years

Accessories: Assistant rope and grommets for easy installation and extra durability.

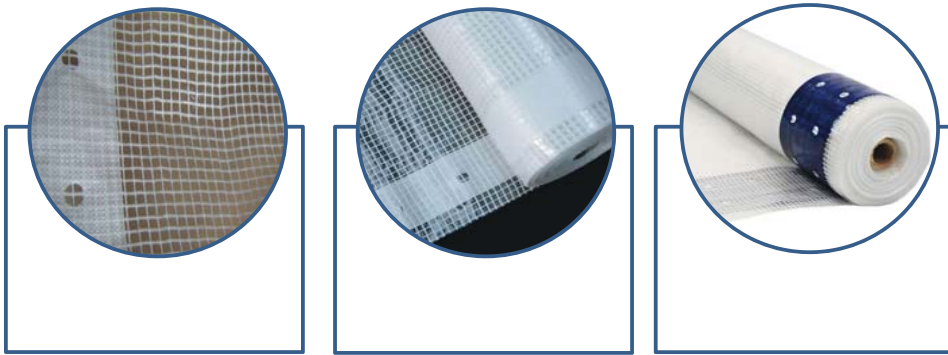

SAFETY NET

During construction, safety nets prevent injury from falling debris and provide a safe environment for workers, pedestrians, and traffic. Our safety nets are usually used for construction of buildings, bridges, viaducts, amusement parks, etc.

To offer true protection, our nets are designed and tested to meet your precise specifications, impact-resistance strength, and local fire safety requirements.

SCAFFOLDING SHEET

Scaffold Sheeting is a premium grade string reinforced poly sheeting manufactured with innovative reinforced eyelet bands. The reinforced eyelet bands are laminated onto the sheeting and provide a quick, safe and secure method of installation by fastening the sheeting to scaffolding. Naite Sheeting is designed to be installed with specialty bungee ties using the "Push, Pull, Hook" method.

Materials: High-density polyethylene (HDPE) with 100% LDPE coating, and fire retardant additives

Mil thickness: 9 mil, 12 mil

Weight: 130-240g/m2 (common weight: 170g/m2, 180g/m2)

Size: Width: 2--8m, Length: 20-100m (standard roll size: 3.2 x20m, 3.3 x30M)

Function: tear resistant, Water resistant, mildew resistant etc

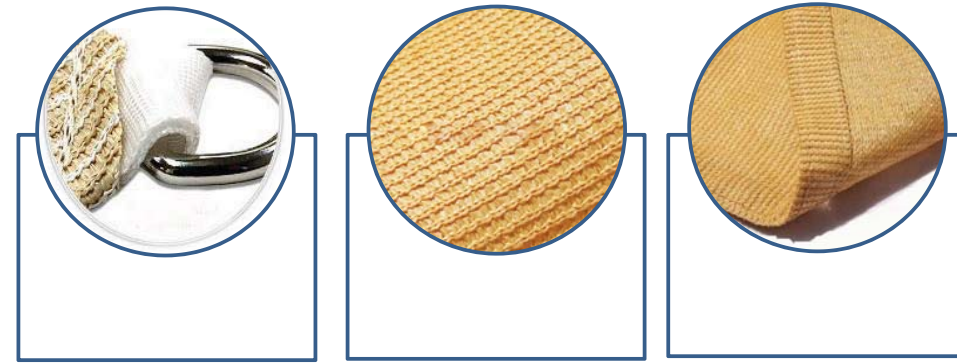

Usage: Protective scaffolding enclosure, Demolition, dust & debris control and Total weather protection etc

Warranty: 3 year

Remark: Manufactured with reinforced eyelet bands for fastening bungee ties

SHADE SAIL

In addition to shade canopies and umbrellas, shade sails are one of the most innovative and attractive ways to shade your space. It can withstand extreme temperatures and resist fading and mildew and water-proof as well. We use SS 304 D-ring, high quality SS carabiners and PE ropes to make them more durable.

Material: High-density polyethylene (HDPE) & anti-UV & PE rope

Shape: Square, rectangular or triangular

Size: 8' x 10' , 10' x10' , 12' x16' , 20' x20' etc

Col: Green, black, beige, brown, red, yellow, white, grey etc

Weight: 100-350gsm/m2 (common weight: 135, 185gsm)

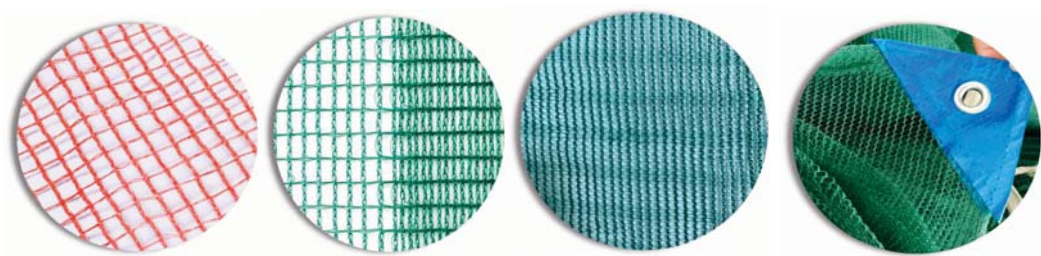

Shading effect: 85%-100%, Blocks out 95% of harmful UV rays

Warranty: UV stabilized, 5 years warranty

Accessories: PE rope & bag, SS D-ring & SS carabiners

OLIVE NET

Materials: High-density polyethylene (HDPE) and anti-UV additives
 Size: Width: 1-6m, length: 10-200m (common size: 4x8m, 5x10m, 8x8m, 4-8x50m etc)
 Weight: 30-150g/m² (common weight: 60g/m², 100g/m²)
 Color: Orange, green color etc
 Warranty: 2-5 years
 Accessories: Assistant rope and PE tarps for easy installation and extra durability

Olive nets are frequently used in areas rich in olives. However, our olive nets are also use for other fruit harvest in agriculture.0 building a net system hanging among fruit trees, farmers can protect your soft ripe fruit from hitting the ground directly. Knitted nets, compared to plastic film,

WINDBREAK NET

Materials: High-density polyethylene (HDPE) flame retardants, and anti-UV additives
 Wind Reducing: 35%-75%
 Size: Width: 1-6m, length: 10-200m (common size: 2x50m, 4x50m etc)
 Weight: 50-300g/m² (common weight: 100g/m², 220g/m²) Color: green, beige, white, grey black and white color
 Warranty: 2-5 years
 Additional Feature: Provide 45%-85% shade
 Accessories: Assistant rope and grommets for easy installation and extra durability.

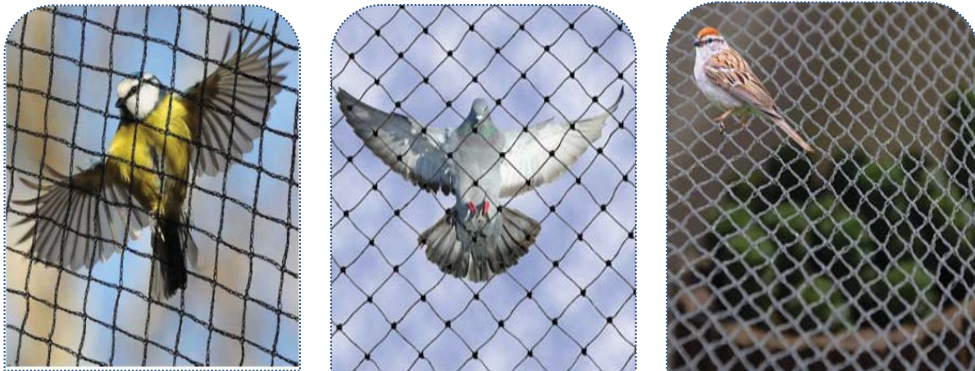

Our knitting windbreak nets are widely applied to the reduction of wind and dust in windy areas and regions of desertification, such as mine fields, ports, construction sites, and expressways. To meet fire and safety requirements, we add fire retardants, anti-UV additive and antioxidants to protect nets from flame and tear as well as ultraviolet degradation.

BIRD NET

Naite's bird net is an inexpensive and effective solution to prevent birds from entering into specific areas and causing damage of valuable property; such as agricultural areas and family courtyards. Plants also enjoy sunlight and water normally with our penetrable nets and avoid unnecessary pollination and bird droppings with viruses* It's also a safe physical solution to keep pigeons, deer, and pests away from where you need to protect without fatal damage since some animals are protected by local laws.

Materials: High-density polyethylene (HDPE) and anti-UV additives
 Size: Width: 1-12m, length: 10-100m (common size: 4x50m , 12x100m)
 Weight: 50-130g/m2 (common weight: 60g/m2, 80g/m2, 100g/m2).
 Color: black and white
 Warranty: 2-5 years
 Accessories: Assistant rope and grommets for easy installation and extra durability.

HAIL NET

With sturdy stitching and resilient diamond-pattern weave, our hail nets are suitable for outdoor crop protection. Strong high-density polyethylene materials and functional additives help to defend against the heavy weather and resist tearing and fraying.

Materials: High-density polyethylene (HDPE) and anti-UV additives
 Size: Width: 1-6m, length: unlimited (common width: 2x50m, 4x50m)
 Weight 50-130g/m2 (common weight: 70g/m2, 100g/m2).
 Color: White, green, grey, black etc
 Warranty: 2-5 years
 Accessories: Assistant rope and grommets for easy installation and extra durability.

FISHING NET

Materials: High-density polyethylene (HDPE), Nylon
 Filament: Monofilament; Multifilament
 Mesh Size: 10-400mm; Depth: 10md-1000md
 Color: Natural white, blue etc
 Warranty: 2 years
 Knot: Single/double knot; Stretched: Depth way , lenth way

The fishing net, including aquaculture cages and fishing systems, is used for cultivating and catching freshwater and saltwater aquatic products.

According to the fish being raised, we can provide fishing nets with adjustable structures and in different mesh size to avoid escaping.

SPORTS NET

Materials: Polyester fabrics (Terylene) ; Nylon etc

Size: Width: 1-15m, length: 10-100m

Weight: 100-400g/m2

Color: green, black , red etc

Warranty: 2-5 years

Accessories: Assistant rope and trimings for easy installation and extra durability.

Sports nets play an important role in protecting spectators and property from being hit by speeding balls. With reasonable mesh size and diameter of the wire, our net balance the strength of nets and vision of spectators.

PLANT SUPPORT NET

Plant support netting (also named plant climbing net, cucumber net, plant trellis net), is a solid versatile plastic mesh, designed to climbing plants or vegetables to grow up. to provide vertical support and horizontal support.

It allows better penetration of sprayed agrochemicals among its leaves and increases fruit size and quality as well as the physical appearance.

Materials: 100% High-density polyethylene (HDPE) / PP & UV
 Colors: Green, black, white etc
 Mesh hole: 15 x 17cm, 10 x 10cm, 15 x 15cm, 13 x 13cm, 20 x 20cm
 Weight: 8-20g/m²
 Size: Width: 1—10m, Length: Unlimited (common size: 100M, 500M, 1000M)
 Usage: Vegetable crops, flowers, etc
 Warranty: 2 year

GROUND COVER NET

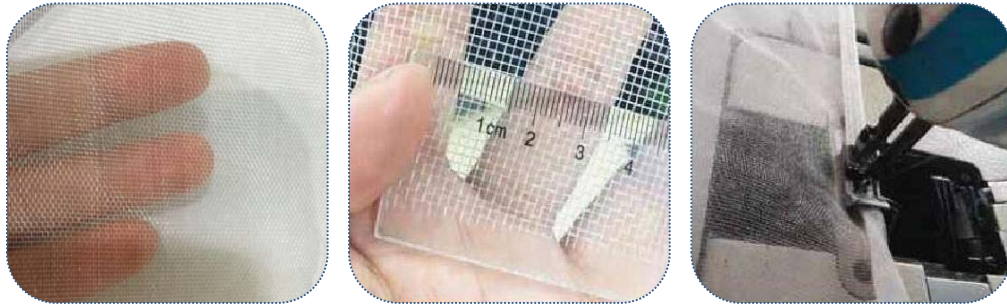

Ground Cover is also called anti grass cloth, weed control fabric. It stops weeds from growing without the use of harmful chemicals, NAITE is the premium choice in ground cover fabric ideal for greenhouses, nurseries, and other growers. The material is made with tightly woven UV resistant polypropylene yet allows water to drain quickly without getting trapped.

Materials: 100% High-density polyethylene (HDPE) / PP & UV
 Colors: Green, black, white etc
 Weight: 60- 200g/m² (common weight: 90g/m², 130g/m²)
 Size: Width: 1 —6m, Length: Unlimited (common size: 50M, 100M, 200M)
 Usage: Agriculture garden, horticultural household, greenhouse, farm, etc
 Warranty: 2 -5 year

ANTI-INSECT NET

Materials: 100% High-density polyethylene (HDPE) & UV
 Colors: white, blue, green etc
 Weight: 50-150g/m² (common weight: 60g/m²)
 Size: Width: 1--12m, Length: 10-200m (common size: 2x50m, 4x50m)
 Usage: Garden, horticultural, greenhouse etc
 Mesh: 50*25,40*25,40*40 etc
 Useful life: 3-5 year

Anti-Insect netting(insect screens) is a sturdy woven net made from HDPE with UV stabilised. When attached to the sides and roofs of greenhouses will provide the essential barrier between the crops and the insects that spread diseases.

The Anti-Insect Nets are strong, tear resistant and light enough to place on the crops, while allow the Water and air circulate through.

PE/PP TARPAULIN

Materials: 100% High-density polyethylene (HDPE)/PP& UV & LDPE coating
 Colors: Blue, orange, red, grey etc (custom)
 Weight: 70-300g/m² (common weight: 90g/m², 150g/m², 200g/m²)
 Size: Width: 1-12m, Length: Unlimited (common size: 4x6m, 6x10m, 2x50m, 2x100m)
 Usage: Agriculture garden, playground, truck cover etc
 MOQ:3 TON

PE tarpaulin (PE tarps, poly tarps) is generally made of HDPE / PP material with high temperature, UV resistant and water-proof feature and its surface is coated with LDPE laminated woven cloth while still allowing natural light penetrate to give illumination. With strong reinforced plastic triangle but lightweight and easy to handle, it is shrink proof as well.

It generally used in cargo/truck cover, rain shelter, playground and outdoor tent ect while not suitable for long-term use in the open air environment.

CERTIFICATION

Top 7 reason why you choose Naite

1. Professional R&D team: With 5 engineers and 2 designers to better understand your requirement.
2. Your one-stop solution supplier: We manufacture kinds of nets and trade kinds of tarps to help you expand the market and save the sourcing time and money.
3. More Competitive and affordable price: We can use different materials, new, recycled and mix PE or PP to meet your price points,
4. Guaranteed Quality: Zero returns since 2011 and we inspect 15% more of our output than the competitors.
5. Convenient transportation: 4 hours to Qingdao Port, 5 hours to Shanghai port, 6 hours to Ningbo port.
6. Packing Knowledge: With more than 10 years exporting experience, we know it better whether to use carton, pallet or plastic rolls to maximize the container space.
7. Best after-sales service: 24 hours 7 days service team can always help you solve the concern.

GLOBAL EXHIBITION

Here are the international exhibitions we attend years earlier—Dubai fair; Kenya Trade week; Malaysia one build, to show our strength in production ability and product ranges.

Why purchase from Naite?

Naite® is your TRUE Professional shade net, shade Sail and poly Tarp etc Store.

TRUE 5 STAR RATING*** Industrial Suppliers' favorite source.

Naite has been in business for more than 10 years.

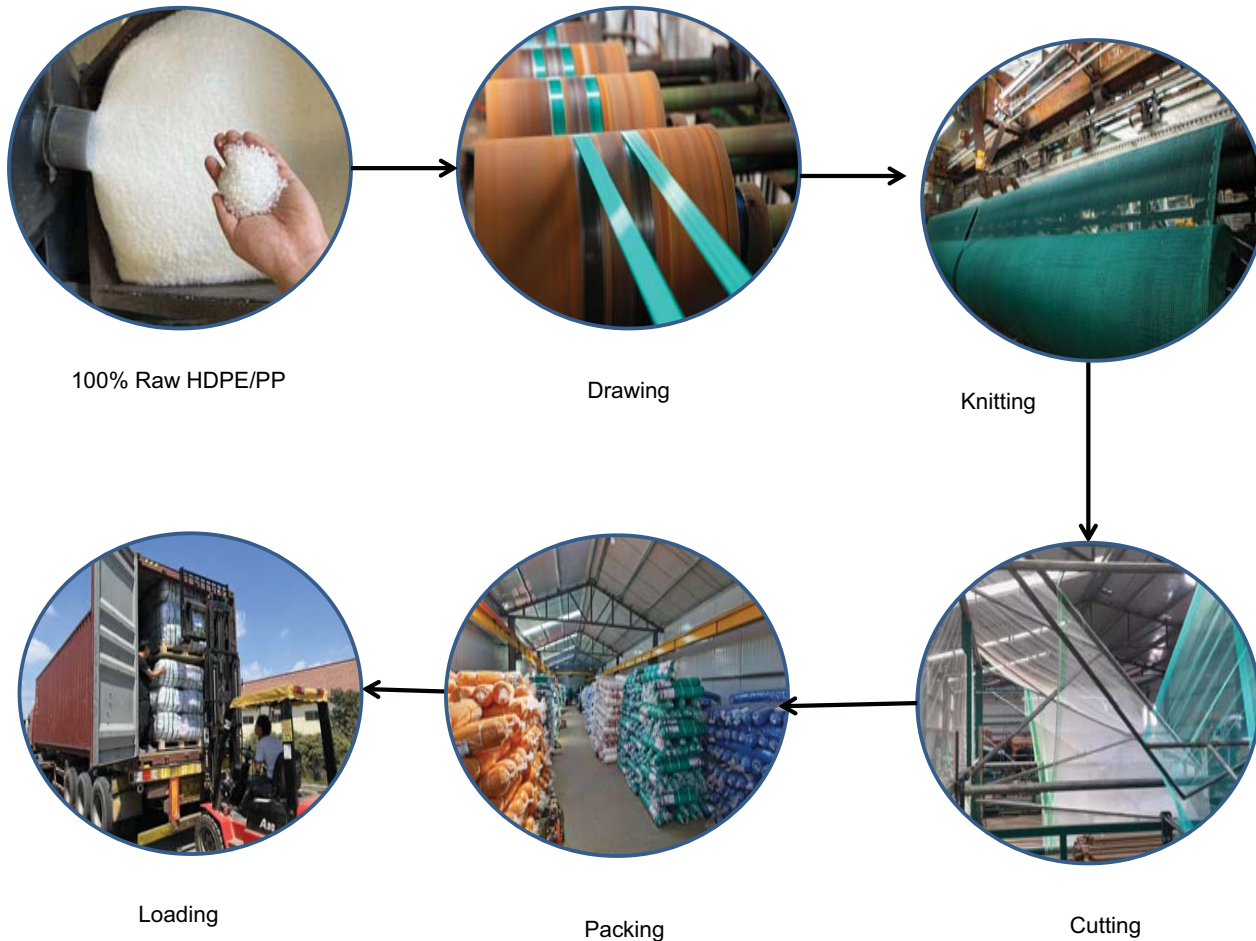

Your Warranty is secured and guaranteed We guarantee to provide brand-new high-quality Products with

REAL SPECIFICATIONS, e.g. Material Size, UV Block Level, and Waterproof Level.

Our aggressive pricing allows us to distribute only the best Products ensuring you receive the best-performing products available

MANUFACTURING LINES

Our experienced engineers acquire different knitting methods to realize designed mesh size and impact-resistance strength.

With 11 net knitting facilities for maintaining the standard! production, our production capacity reaches up to 100 tons per month.

QUALITY TESTING

Before we deliver the final net products to you, our responsible QC staff will conduct a full! inspection of the net appearance.

In addition, each safety net at Naite is certified by the national! standard for testing labor protection articles to ensure the safety of users.

We also apply aging test of our shade nets to prove that nets are still usable after 5-year UV exposure

WARRANTY

We are confident in the quality of our nets. Most of our products are covered by a 2-year warranty. Different products have different warranties according to the service environment. Defective products due to design and manufacturing faults are covered under the limited warranty.

PACKAGE & SHIPPING

A good package should combine both aesthetics and protective functions.

We provide custom packaging to beautify your nets and protect nets from damage during transportation, including inside printed leaflets and labels and flexible outside packaging.

WAREHOUSE

To minimize your worries of excessive cost in warehouse storage and management we have set up an independent space to store your nets.

With our two-month warehouse storage services, you can be flexible in the schedule and budget of your project.

Note:

Q&A:

1. What are your major markets focus on?

A: Our main markets are in America, Africa, Asia and Europe.

2. What's the MOQ?

A: For customization, mostly 2-3 tons. If we have ready stock, then no need.

3. What's the payment term?

A: T/T with 30% deposit, L/C, West union, Paypal etc

4. What's the lead time for production?

A: For 1x20' GP (5 Ton), 15-20 days; 1x40' HQ(13 ton), 25-30 days

5. How's the packing?

A: Inside PE plastic transparent bag, outside nylon woven bag; cartons and pallets. (we can pack as per your request)

6. May I get the sample?

A: Yes, we will send it based on the ready stock we have or customize it.

7. How's the QC inspection?

A: We have professional QC team do the audit before, during and after the production.

8. What's the loading port?

A: Qingdao port, Shanghai and Ningbo port.

9. How many years warranty and what will you do for the damaged goods?

A: Mostly 2 years (depends on the goods). We'll do 1 to 1 exchange for the faulty items due to manufacturing issue.

10. Where are you located and do you accept OEM?

A: We are located in Binzhou city, Shandong Province. Yes, we do OEM.
